

# Covid Pandemonium : Analyzing Impact on Commerce and Economy

---

**SBES College of Arts and Commerce,  
Aurangabad, Maharashtra**

**National Webinar  
10. 7. 2021 @ 10:00 AM**

## **Saraswati Bhuvan Education Society**

The Saraswati Bhuvan Education Society and the college have a long and distinguished history in the domain of education. Saraswati Bhuvan Education Society, established in 1915, is one of the oldest and pioneering institutions in the region. It has always promoted, besides formal education, democratic values. Society owes a profound sense of gratitude to its founding fathers under whose judicious leadership it has taken its present shape. From a modest beginning in the pre-independence times, it has flourished into a prestigious institution having 18 schools and 2 colleges educating more than 25,000 students' thereby imparting education from the first standard to PhD in most of the academic disciplines. The Government of Maharashtra bestowed "The Ideal Institute in the State Award" to the institution in its very year of inception in the year 2000. Society is constantly engaged in bringing out the best in students and in making education relevant to contemporary demands.

## **SBES College of Arts and Commerce**

The COVID-19 pandemic has created a scenario of uncertainty in all the sectors of public life. Higher education is no exception. We in SBES College of Arts and Commerce are responding to this challenge with a focus set on students' safety and parents' worry and looking forward to serving in the best possible way. We have adapted ourselves to the new normal by adopting e-teaching-learning techniques. We are determined to strengthen the existing and establish new e-infrastructure for education. The upheaval in political, social, economic and cultural life has led to an increase in awareness of the need to understand the world from a range of perspectives and have created a demand for people with specialization and competencies. We provide opportunities to the students to face the challenges of the times. We have UG and PG level programs in the faculty of humanities, commerce and management science to meet the new challenges and demands in education.

## About Webinar

COVID-19, the virulent disease has created uncertainty in all the domains of public life. The impact is evident on stock markets, supply-chain and logistics resulting in volatile National economies. The temporary suspension or significantly reduced industrial operations are resulting in layoffs with soaring unemployment the world over. People are reluctant to start new businesses resulting in start-up depression. The upheavals in health and education are unfathomable.

Every national government is coming up with measures and packages but they are also treading in unforeseeable waters. Food security, grants for healthcare, sectoral incentives, *Atmanirbhar Abhiyan* to provide an economic boost, an extension of tax deadlines, etc., are the measures undertaken by the government of India. The world is envisioning the models and strategies for economic recovery.

The proposed National webinar will deliberate on analysis and assessment of a variety of unanticipated pandemic consequences and will also discuss the ways to address them. We are looking forward to the scholarly contribution from all of you on the theme and sub-themes of the webinar.

## Theme

Covid Pandemonium : Analyzing impact on Commerce and Economy
